2) Develop an Android application using controls like Button, TextView, EditText for designing a calculator having basicfunctionality like Addition, Subtraction, Multiplication, and Division.

activity_main.xml

MainActivity.java:

```
| Semple Calculation applies | Semple Calculation |
```

Final Project:

SIMPLE CALCULATOR

SIMPLE CALCULATOR

Result			
2			
7	8	9	1
4	5	6	*
1	2	3	=
- v.]	0	=	+
С			

Result of 25*2:

SIMPLE CALCULATOR

Result

50.0
